

DrewPost.net / DrewPost.us  
September 17, 2017

Earlier today the server hosting DrewPost was accessed by an unauthorized user, who uploaded phishing content to part of the main DrewPost site. No user account data, or posts were stolen and all user accounts are untouched. If you would like to change your password, visit the settings page and change your password using the password change form. Sorry for any inconvenience.

Thanks,  
Drew Graham
